

# Regency Road to Pym Street Project

## WORKS NOTIFICATION

July 2020

## *Road works at Pym Street junction with South Road, Croydon Park*

The R2P Project has been constructing the South Road surface roads in preparation for an upcoming traffic switch. These works require a temporary closure of some roads at their junction with South Road.

From Wednesday, 8 July 2020, works will be undertaken on Pym Street, on both the eastern and western sides of South Road.

### **How long will the works take?**

Night works will be undertaken from **Wednesday, 8 July 2020, for four weeks weather permitting, between 7pm and 6am each night**. No works will occur on Friday and Saturday nights.

### **How will the works impact me?**

During the works, Pym Street will be firstly closed to motorists on the western side, between Austin Street and South Road.

Once these works are complete, Pym Street will then be closed on the eastern side, between Charron Road and South Road.

Signage will be in place to advise motorists of the road closure and detour routes via Rugby Avenue onto Crossley Avenue for the western side closure of Pym Street, and Overland Road onto Charron Road for the eastern side closure of Pym Street.

# Regency Road to Pym Street Project

## WORKS NOTIFICATION

July 2020

Works will include saw cutting of the road, removing existing asphalt and kerb and gutter, and constructing new asphalt and kerb and gutter.

Some noise and vibration can be expected at times, however the works will be managed to minimise disturbance to local residents as much as practically possible.

Access for emergency service vehicles will be maintained at all times.

There will be no change to public transport services and access to residential properties on Pym Street will be maintained.

Pedestrian access will not be affected during these works.

Please plan ahead and take extra care when workers are on site. Observe speed limits, lane restrictions and traffic controllers when travelling through the area.

### Questions?

Please contact the R2P Alliance project team on the details provided below.
